Maudore Welcomes Major Shareholder

Montreal, Quebec CANADA, April 21, 2008 - Maudore Minerals Ltd. (**MAO** TSX-Venture Exchange; **M6L** Frankfurt Exchange) has been advised by Geneva, Switzerland-based **Galena Special Situations Master Fund Limited** that it recently increased its Maudore holdings to 1,955,400 shares and now owns 12.4% of the company's outstanding shares. Galena first invested with Maudore in a private placement completed in May 2007.

The Galena Special Situations Fund Limited is managed by Galena Asset Management Limited, which currently has assets under management in excess of \$750M invested in equity related instruments and commodity derivatives across a number of natural resources funds.

Maudore's largest shareholder remains Anglo Pacific Group PLC (Anglo), with 16.0% of the company's outstanding shares. Anglo is listed on the London and Australian Stock Exchanges; its returns come from royalties on Australian coal mines operated by BHP and Rio Tinto. A substantial portion of the royalty income is paid as dividends to Anglo's shareholders with the balanced invested in about fifty strategic mineral stocks.

Maudore's recent exploration success on its 100% owned Comtois Deposit, located in Quebec, includes drill results of 198.5 g/t over 1.5 meters at a depth of about 250 meters. Comtois has an NI 43-101 compliant Inferred Resource of 808,000 tons containing 524,000 oz gold at a grade of 20.2 g/t (uncut), all of which is located within the first 200 meters from surface.

In 2008 Maudore has announced several intercepts from ongoing drilling programs (two drills are currently at work) which indicate that the Comtois area possibly hosts mineralization at greater depth, width, and length than the 2002 NI 43-101 report established. Work at Comtois continues, and assays are pending for numerous recently-drilled holes.

On behalf of the Board of Directors of Maudore Minerals Ltd:
"Ronald Shorr" President/CEO and Director
